# **ALCOVE**

Designed by Cider Edition

## MICRO-ARCHITECTURE I A COUSTIC ALCOVE

Alcôve is an ingenious system that makes it possible to recreate a space within a space without work. Both an acoustic cabin or phone box, a solitary workstation or a project-based workspace, Alcôve is available in multiple configurations to meet the needs of concentration, intimacy and confidentiality of open space or coworking spaces. A welcome interlude for its users, who come to isolate themselves from the noise and flow, a bubble not to be disturbed and not to disturb. The Alcove acts on sound reduction thanks to partition walls composed in the central part of an acoustic absorber made of PET and covered with fabric that contributes to this reduction.

Designed by Cider Edition

## **TECHNICAL DESCRIPTION**

#### 1 - Partition

Interior: Solid wood structures covered inside and outside with embossed acoustic fabric with 6mm foam support (Gabriel - Atlantic Stripe - CAL 117 and EN1021 certification for non-flammability, resistance to cigarette sparks) which are glued together (wood and fabric). The upper edge will be covered with standard fabric. Available in rectangular, hexagonal and square shapes.

or rounded corners. Supporting structures of the panels connected by metal side plates fixed by 4 screws, and 2 metal legs at the top and bottom, each with 4 screws, connect the structures to ensure good fixation and a high resistance of each configuration.

Exterior: Fully carpeted partitions, single or twotone. Black powder coated metal trim.

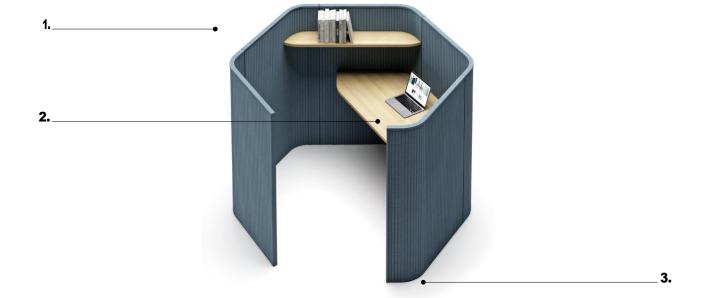

#### 2 - Tray

High resistance melamine top, 22 mm thick, with a density of +/-3% of 770 kg/m3. Smooth or lightly textured melamine decor sheet according to the choice of finishes.

2 mm thick ABS edges as standard. Tray fastening by means of a metal squaring system

#### 3 - Legs

4 cm high glides with adjustment jacks

## **ACOUSTICS**

• Focus is a product certified for its acoustic qualities, according to ISO 10053, a method for measuring the sound attenuation provided by screens intended for use in rooms to provide more privacy for conversations or to improve sound insulation between workstations.

FOCUS DATA SHEET Page:

## **PRODUCT CERTIFICATIONS**

- · FSC & CARB wood
- · Indoor air emission quality A+ (ISO 16000)
- · CFC free
- · Foam PET 01
- GREENGUARD certified fabric

## **OPTIONS**

#### **ELECTRIFICATION OPTIONS**

#### Top access

Top access with slow motion access for meeting stations.

#### Socket 1

Rectangular aluminium flush-mounted socket outlet. Sliding cover in black or white plastic. One standard mains socket and two USB sockets

#### Chute

Fixed to the supporting structure and made f r o m a 1 mm thick folded metal sheet.

#### Socket 2 box

Round flush-mounted socket outlet in black or white plastic. A classic socket and a USB socket

#### Cable lift

Thermoformed fishnet sock

## **MAINTENANCE**

#### • FABRIC

To maintain the fabric, regularly remove dust and lint with a hoover. If a stain occurs, wipe the fabric immediately with an absorbent, lint-free sponge or cloth. Rub the stain with a damp cloth soaked in ordinary household distilled water to prevent water spots from forming on dark fabrics after drying. Test a hidden area beforehand.

For stubborn stains: lightly brush the stains with a soft, dry brush.

#### • METAL

Clean with a microfibre cloth soaked in neutral soap or neutral cleaners diluted in water. For varnished products, avoid cleaners containing alcohol, granular cleaners and solvents in general. For other finishes, the use of a specially formulated metal cleaner is recommended.

#### MELAMINE & WOOD SURFACE

For ordinary cleaning, use a soft cloth moistened with warm water or non-aggressive detergents, or a mixture of 95% water and 5% denatured alcohol. Follow the grain of the wood. Test a hidden area beforehand. Avoid strong detergents, solvents and stain removers.

## **GUARANTEE**

- 5 year warranty
- 10-year manufacturing life

## **ECOLOGICAL FOOTPRINT**

- Italian manufacture
- Assembly France
- FSC and ISO 14001, 9001, 45001 certified wood factory
- Eco-responsible wood sourcing and management, 100% recyclable and FSC & CARB certified
- Legs and metal parts made of 100% recyclable steel, painted with A and E1 classification
- Songs with A and E1 classification
- Our fabrics are Global Recycled Standard / EU ecolabel / RAL UZ / Green Guard/Blue Angel certified depending on the choice of finish.
- Water-based neoprene adhesive, no VOC emissions

## **ENVIRONMENTAL STATEMENT**

### · Getting involved, concretely

Because we were keen to offer products that deeply embody who we are, Cider is committed to offering furniture that is an agent of change, respectful of the environment and of the quality of life of its users.

Our commitment to the environment and quality is part of a global and concrete approach, involving all areas of activity of the company and its partners: from eco-design to manufacturing, from the choice of materials to their supply, from logistics to transport, from the life cycle of products to their recycling.

Committed, we are certified Gold by the EcoVadis label for our CSR, ISO 14001 for the environmental performance of our production cycle. Our Group is committed to human rights and environmental issues and has been a member of the United Nations Global Compact since 2014. We are also a member of Valdelia and a signatory of the UNIFA (Union Nationale des Industries Françaises de l'Ameublement) CSR charter.

## · Designing, sustainably

The products proposed and published by Cider are designed to last. Evolutive, their design combines function and aesthetics, freeing itself from fashion and superfluousness for a longer life.

The right number of components, the maximum number of interchangeable and reusable parts, the encouraged use of recyclable, resistant and easy-to-maintain materials, and a majority of the production to order for a signed project: these are the pledges of a reasoned and environmentally friendly design, capable of avoiding unnecessary waste and reducing the use of energy and natural resources.

It is on this basis that Cider guarantees its products in the tertiary range for 5 years (with the exception of the gas cartridges in the chairs, which are guaranteed for 2 years) and 2 years in the image range. The manufacturing durability is 10 years for the tertiary range and 5 years for the image range.

#### Produce, with awareness

We share with our manufacturers a common commitment to quality and the environment. Our industrial partners are located exclusively in Italy and are for the most part ISO 9001 and 14001 certified, a true guarantee of quality and short, controlled circuits.

Their know-how and high standards are based as much on traditional techniques as on the latest technologies, with a view to ensuring a high standard of quality and continuous improvement at every stage of the production process, while respecting natural resources.

Our key partners follow the REACH standard for resource conservation, component separability and end-of-life recyclability of materials. They constantly strive to reduce and eliminate VOC emissions and use only products with A and E1 classifications. Our factories favour European materials, sourced from Italy and Germany and recyclable. They use FSC or PEFC certified wood and Oeko Tex certified fabrics.

The reduction and recycling of waste and packaging is a concern shared by all.
