

GOMMETTES

Designed by Juam for Cider Edition

ACCESSORY | ACOUSTIC PARTITION

Inspired by the undulations of a flag in the wind, the innovative Gomette screen brings a touch of conviviality to work spaces while preserving the privacy of its users. The two wavy Varian shapes rest on a metal support inspired by kimono stands. Of different heights and looks, these forms combine and overlap to play on opacity and create interior landscapes. The openwork material of the Varian creates an intimate space while allowing light to shine through in certain places. The main feature of the screen is the two eco-friendly woven drapes made from linen, Varian®, manufactured by CultureIN. Varian is a composite fabric combining linen fibre and biosourced resin. It combines technique and aesthetics for the eco-design, layout or decoration of living spaces.

GOMMETTES

Designed by Juam

TECHNICAL DESCRIPTION

1 - Structure

Black or gold tubular structure resting on a thin, flat base for perfect stability on the ground

2 - Panel

The panels of the screen are made of Varian®, which is halfway between a composite and a textile material.

It is completely eco-responsible and VOC-free. It has been manufactured in an environmentally friendly way, without water or solvents.

3 - Weaving

Woven with a combination of linen and vegetable yarns, Varian® is a fabric that can be easily shaped. These include thermoforming, hot-folding and bending. The cutting, assembly and finishing possibilities are identical to those of textiles.

MAINTENANCE

• VARIAN

To maintain the Varian, regularly remove dust and lint with a Hoover. If a stain occurs, wipe it immediately with an absorbent, lint-free sponge or cloth. Rub the stain with a damp cloth soaked in ordinary household distilled water to prevent water spots from forming on dark fabrics after drying. Test a hidden area beforehand.

For stubborn stains: lightly brush the stains with a soft, dry brush.

• METAL

Clean with a microfibre cloth soaked in neutral soap or neutral cleaners diluted in water. For varnished products, avoid cleaners containing alcohol, granular cleaners and solvents in general. For other finishes, the use of a specially formulated metal cleaner is recommended.

GUARANTEE

- Product guaranteed for 2 years
- Manufacturing life 5 years

ECOLOGICAL FOOTPRINT

- Italian manufacture
- Assembly France
- Metal parts made of 100% recyclable steel, painted with A and E1 classification
- Varian: eco-responsible, solvent-free material

ENVIRONMENTAL STATEMENT

• Getting involved, concretely

Because we were keen to offer products that deeply embody who we are, Cider is committed to offering furniture that is an agent of change, respectful of the environment and of the quality of life of its users.

Our commitment to the environment and quality is part of a global and concrete approach, involving all areas of activity of the company and its partners: from eco-design to manufacturing, from the choice of materials to their supply, from logistics to transport, from the life cycle of products to their recycling.

Committed, we are certified Gold by the EcoVadis label for our CSR, ISO 14001 for the environmental performance of our production cycle. Our Group is committed to human rights and environmental issues and has been a member of the United Nations Global Compact since 2014. We are also a member of Valdelia and a signatory of the UNIFA (Union Nationale des Industries Françaises de l'Ameublement) CSR charter.

• Designing, sustainably

The products proposed and published by Cider are designed to last. Evolutive, their design combines function and aesthetics, freeing itself from fashion and superfluity for a longer life.

The right number of components, the maximum number of interchangeable and reusable parts, the encouraged use of recyclable, resistant and easy-to-maintain materials, and a majority of the production to order for a signed project: these are the pledges of a reasoned and environmentally friendly design, capable of avoiding unnecessary waste and reducing the use of energy and natural resources.

It is on this basis that Cider guarantees its products in the tertiary range for 5 years (with the exception of the gas cartridges in the chairs, which are guaranteed for 2 years) and 2 years in the image range. The manufacturing durability is 10 years for the tertiary range and 5 years for the image range.

• Produce, with awareness

We share with our manufacturers a common commitment to quality and the environment. Our industrial partners are located exclusively in Italy and are for the most part ISO 9001 and 14001 certified, a true guarantee of quality and short, controlled circuits.

Their know-how and high standards are based as much on traditional techniques as on the latest technologies, with a view to ensuring a high standard of quality and continuous improvement at every stage of the production process, while respecting natural resources.

Our key partners follow the REACH standard for resource conservation, component separability and end-of-life recyclability of materials. They constantly strive to reduce and eliminate VOC emissions and use only products with A and E1 classifications. Our factories favour European materials, sourced from Italy and Germany and recyclable. They use FSC or PEFC certified wood and Oeko Tex certified fabrics.

The reduction and recycling of waste and packaging is a concern shared by all.
