

VENTURE JOINT

Designed by Frédéric Ruyant for Cider Edition

WORKSTATION I O R G A N I C OFFICE

Joint Venture is a collection of modular desks that respond to the multiplicity and flexibility demanded by today's work spaces. The collection is based on a series of modules with clean lines, which can be combined endlessly to satisfy all needs, from the meeting table to the double workstation. It intelligently and elegantly serves a world of work where hierarchical codes are transformed and where collaboration, sharing and exchange become key values. Simple, sober tops and legs, available in several materials and colours, can be accessed and combined according to requirements.

VENTURE JOINT

Designed by Frédéric Ruyant

TECHNICAL DESCRIPTION

1 - Tray

• High resistance melamine top, 22 mm thick, with a density of +/-3% of 770 kg/m³. Smooth or slightly textured melamine decor sheet, depending on the choice of finishes. Counterbalance in melamine with the same finish.

OR

• Powder-coated MDF top, coated with the epoxy powder paint normally used for metal. No glue is used and therefore no VOC emissions. Curved/rounded edges. ABS edges of 2 mm thickness as standard, finishes as for the top.

2 - Legs

Structure composed of two metal crosspieces with epoxy powder coating.

Two metal ring legs, square section 25mmx25mm. Attached to each other and to the stage, thanks to a metal structure that bridges the gap

4 - Cylinders

20 mm diameter PVC adjusting cylinders. Adjustment stroke of 13 mm.

3 - Feet

The metal foot is fixed to the metal structure by metal inserts and screws.

Metal junction piece underneath the tray to ensure a good fit between the two modules.

MAINTENANCE

• POWDER-COATED SURFACE

Lacquered surfaces require particularly careful maintenance to avoid scratches. To clean, use neutral soap or alcohol diluted in plenty of water, and dry immediately with a soft cloth, if possible white and non-abrasive. It may happen that during the first cleaning the cloth becomes slightly coloured. This is due to the presence of paint dust on the surface during the drying process: once this is removed, the problem is solved. Avoid strong detergents, solvents and stain removers.

• MELAMINE & WOOD SURFACE

For ordinary cleaning, use a soft cloth moistened with warm water or non-aggressive detergents, or a mixture of 95% water and 5% denatured alcohol. Follow the grain of the wood. Test a hidden area beforehand. Avoid strong detergents, solvents and stain removers.

• METAL

Clean with a microfibre cloth soaked in neutral soap or neutral cleaners diluted in water. For varnished products, avoid cleaners containing alcohol, granular cleaners and solvents in general. For other finishes, the use of a specially formulated metal cleaner is recommended.

GUARANTEE

- 5 year warranty
- 10-year manufacturing life

ECOLOGICAL FOOTPRINT

- Italian manufacture
- Assembly France
- FSC and ISO 14001, 9001, 45001 certified wood factory
- Eco-responsible wood sourcing and management, 100% recyclable and FSC & CARB certified
- Frame and metal parts made of 100% recyclable steel, painted with A and E1 classification
- Edges with A+ and E1 classification

ENVIRONMENTAL STATEMENT

• Getting involved, concretely

Because we were keen to offer products that deeply embody who we are, Cider is committed to offering furniture that is an agent of change, respectful of the environment and of the quality of life of its users.

Our commitment to the environment and quality is part of a global and concrete approach, involving all areas of activity of the company and its partners: from eco-design to manufacturing, from the choice of materials to their supply, from logistics to transport, from the life cycle of products to their recycling.

Committed, we are Gold certified by EcoVadis for our CSR, ISO 14001 for the environmental performance of our production cycle. Our Group is committed to human rights and environmental issues and has been a member of the United Nations Global Compact since 2014. We are also a member of Valdelia and a signatory of the UNIFA (Union Nationale des Industries Françaises de l'Ameublement) CSR charter.

• Designing, sustainably

The products proposed and published by Cider are designed to last. Evolving, their design combines function and aesthetics, freeing itself from fashion and superfluity for a longer life.

The right number of components, the maximum number of interchangeable and reusable parts, the encouraged use of recyclable, resistant and easy-to-maintain materials, and a majority of the production to order for a signed project: these are the pledges of a reasoned and environmentally friendly design, capable of avoiding unnecessary waste and reducing the use of energy and natural resources.

It is on this basis that Cider guarantees its products in the tertiary range for 5 years (with the exception of the gas cartridges in the chairs, which are guaranteed for 2 years) and 3 years in the image range. The manufacturing durability is 10 years for the tertiary range and 5 years for the image range.

• Produce, with awareness

We share with our manufacturers a common commitment to quality and the environment. Our industrial partners are located exclusively in Italy and are for the most part ISO 9001 and 14001 certified, a true guarantee of quality and short, controlled circuits.

Their know-how and high standards are based as much on traditional techniques as on the latest technologies, with a view to ensuring a high standard of quality and continuous improvement at every stage of the production process, while respecting natural resources.

Our key partners follow the REACH standard for resource conservation, component separability and end-of-life recyclability of materials. They constantly strive to reduce and eliminate VOC emissions and use only products with A and E1 classifications. Our factories favour European materials, sourced from Italy and Germany and recyclable. They use FSC or PEFC certified wood and Oeko Tex certified fabrics.

The reduction and recycling of waste and packaging is a concern shared by all.
