

PYRIA

Designed by Cider Edition

ACCESSORY | LAMP / S U S P E N S I O N

Pyria is the latest addition to the Cider collection of lighting and accessories. This elegant ensemble is available in wall, ceiling and floor lamps. From the Greek pyrós "fire" and the Veneto dialect Impiria "funnel", Pyria pays homage to its region rich in specificities, traditions and craftsmanship. The precision of the lines and the sobriety of the design of the base underline the purity and transparency of the materials. If the inverted funnel symbolises madness, here its alternation marks the search for an ideal balance.

PYRIA

Designed by Cider Edition

TECHNICAL DESCRIPTION

1 - Structure

The structure is made of steel with a black nickel galvanised paint

2 - Base

The base is made of black or gold painted steel and black marble.

3 - Lamp

The lamp is made of turned and varnished Pyrex glass in smoked pink, amber or green. The bulb is a low consumption micro LED

4 - Version

It is available as a wall-mounted version and a floor-standing version with a round base of 200mm dia. and a height of 350mm which is connected to a metal bar.

DEPTH OF RANGE

Lamp on base

Wall lamp

Suspension

MAINTENANCE

• GLASS

Clean regularly with a glass cleaner or a soft, slightly damp chamois. Wipe clean. When combining glass with other materials such as wood or metal, we recommend not spraying the product directly onto the surface, but onto a cloth. Always use detergents sparingly. Also, avoid using chemical and abrasive cleaners, steel wool and scouring pads, as they can damage the glass.

• METAL

Clean with a microfibre cloth soaked in neutral soap or neutral cleaners diluted in water. For varnished products, avoid cleaners containing alcohol, granular cleaners and solvents in general. For other finishes, the use of a specially formulated metal cleaner is recommended.

• MARBLE

Use a soft cloth to remove dust. If there are no specific stains, wipe the surfaces with a microfibre cloth moistened with warm water. Avoid acidic and corrosive substances.

GUARANTEE

- Product guaranteed for 2 years
- Manufacturing life 5 years

ECOLOGICAL FOOTPRINT

- Italian manufacture
- Assembly France
- Metal parts made of 100% recyclable steel, painted with A and E1 classification

ENVIRONMENTAL STATEMENT

• Getting involved, concretely

Because we were keen to offer products that deeply embody who we are, Cider is committed to offering furniture that is an agent of change, respectful of the environment and of the quality of life of its users.

Our commitment to the environment and quality is part of a global and concrete approach, involving all areas of activity of the company and its partners: from eco-design to manufacturing, from the choice of materials to their supply, from logistics to transport, from the life cycle of products to their recycling.

Committed, we are certified Gold by the EcoVadis label for our CSR, ISO 14001 for the environmental performance of our production cycle. Our Group is committed to human rights and environmental issues and has been a member of the United Nations Global Compact since 2014. We are also a member of Valdelia and a signatory of the UNIFA (Union Nationale des Industries Françaises de l'Ameublement) CSR charter.

• Designing, sustainably

The products proposed and published by Cider are designed to last. Evolutive, their design combines function and aesthetics, freeing itself from fashion and superfluosity for a longer life.

The right number of components, the maximum number of interchangeable and reusable parts, the encouraged use of recyclable, resistant and easy-to-maintain materials, and a majority of the production to order for a signed project: these are the guarantees of a reasoned and environmentally friendly design, capable of avoiding unnecessary waste and reducing the use of energy and natural resources.

It is on this basis that Cider guarantees its products in the tertiary range for 5 years (with the exception of the gas cartridges in the chairs, which are guaranteed for 2 years) and 2 years in the image range. The manufacturing durability is 10 years for the tertiary range and 5 years for the image range.

• Produce, with awareness

We share with our manufacturers a common commitment to quality and the environment. Our industrial partners are located exclusively in Italy and are for the most part ISO 9001 and 14001 certified, a true guarantee of quality and short, controlled circuits.

Their know-how and high standards are based as much on traditional techniques as on the latest technologies, with a view to ensuring a high standard of quality and continuous improvement at every stage of the production process, while respecting natural resources.

Our key partners follow the REACH standard for resource conservation, component separability and end-of-life recyclability of materials. They constantly strive to reduce and eliminate VOC emissions and use only products with A and E1 classifications. Our factories favour European materials, sourced from Italy and Germany and recyclable. They use FSC or PEFC certified wood and Oeko Tex certified fabrics.

The reduction and recycling of waste and packaging is a concern shared by all.
