

# TROIE

Designed by Maxence Boisseau for Cider Edition

## TABLE | COFFEE TABLE

Troy is distinguished by its combination of irregular elements, as if from their chance meeting a friendship as solid as it is improbable was born. Alone they seem familiar, together they are unlike any other. Trays of different shapes and sizes, large, small, round, ovoid, combined with different materials: oak wood, metal, and glass paste. A bold, tapered and gravity-defying base, imposing and aerial. The transparency of cast glass is brilliantly introduced: a tribute to the Italian know-how typical of the Venice region. In short, a range of forms, materials and dimensions to multiply the functionalities and the possibilities of ambiances.

# TROIE

Designed by Maxence Boisseau

## TECHNICAL DESCRIPTION

### 1 - Round glass table

The table top is made of hand-worked glass paste and attached to the black metal mesh structure. 800mm diameter, 330mm height

### 2 - Wooden coffee table

The top is made of oak veneer on MDF particle board. Folded metal legs. 430mm high, length 1200, depth 800mm

### 3 - Metal pedestal table

The powder-coated structure is composed of a round top with a diameter of 450mm welded to a base formed by three 500mm high tubes, gold varnished.

## DEPTH OF RANGE

Glass coffee

tableWooden coffee tableMetal table

## PRODUCT CERTIFICATIONS

- FSC & CARB wood
- Indoor air emission quality A+ (ISO 16000)
- CFC free

## FINISHES

### • TRO\_TAB\_BOI

WOODEN TRAY

Oak

METAL BASE

Black

### • TRO\_TAB\_VER

GLASS

Green

### • TRO\_TAB\_MET

METAL

Gold

## MAINTENANCE

### • GLASS

Soak the newspaper ball in a mixture of 1/3 white vinegar and 2/3 water. Clean the table with the ball soaked in the solution, then rinse with water and wipe with a clean, dry cloth. The white vinegar can be replaced by lemon juice.

### • WOOD

For ordinary cleaning, use a soft cloth moistened with warm water or non-aggressive detergents, or a mixture of 95% water and 5% denatured alcohol. Follow the grain of the wood. Test a hidden area beforehand. Avoid strong detergents, solvents and stain removers.

### • METAL

Clean with a microfibre cloth soaked in neutral soap or neutral cleaners diluted in water. For varnished products, avoid cleaners containing alcohol, granular cleaners and solvents in general. For other finishes, the use of a specially formulated metal cleaner is recommended.

## GUARANTEE

- Product guaranteed for 2 years
- Manufacturing life 5 years

## ECOLOGICAL FOOTPRINT

- Italian manufacture
- Assembly France
- FSC and ISO 14001, 9001, 45001 certified wood factory
- Eco-responsible wood sourcing and management, 100% recyclable and FSC, CARB certified
- Metal parts made of 100% recyclable steel, painted with A and E1 classification

# **ENVIRONMENTAL STATEMENT**

## • Getting involved, concretely

Because we were keen to offer products that deeply embody who we are, Cider is committed to offering furniture that is an agent of change, respectful of the environment and of the quality of life of its users.

Our commitment to the environment and quality is part of a global and concrete approach, involving all areas of activity of the company and its partners: from eco-design to manufacturing, from the choice of materials to their supply, from logistics to transport, from the life cycle of products to their recycling.

Committed, we are certified Gold by the EcoVadis label for our CSR, ISO 14001 for the environmental performance of our production cycle. Our Group is committed to human rights and environmental issues and has been a member of the United Nations Global Compact since 2014. We are also a member of Valdelia and a signatory of the UNIFA (Union Nationale des Industries Françaises de l'Ameublement) CSR charter.

## • Designing, sustainably

The products proposed and published by Cider are designed to last. Evolutive, their design combines function and aesthetics, freeing itself from fashion and superfluity for a longer life.

The right number of components, the maximum number of interchangeable and reusable parts, the encouraged use of recyclable, resistant and easy-to-maintain materials, and a majority of the production to order for a signed project: these are the pledges of a reasoned and environmentally friendly design, capable of avoiding unnecessary waste and reducing the use of energy and natural resources.

It is on this basis that Cider guarantees its products in the tertiary range for 5 years (with the exception of the gas cartridges in the chairs, which are guaranteed for 2 years) and 2 years in the image range. The manufacturing durability is 10 years for the tertiary range and 5 years for the image range.

## • Produce, with awareness

We share with our manufacturers a common commitment to quality and the environment. Our industrial partners are located exclusively in Italy and are for the most part ISO 9001 and 14001 certified, a true guarantee of quality and short, controlled circuits.

Their know-how and high standards are based as much on traditional techniques as on the latest technologies, with a view to ensuring a high standard of quality and continuous improvement at every stage of the production process, while respecting natural resources.

Our key partners follow the REACH standard for resource conservation, component separability and end-of-life recyclability of materials. They constantly strive to reduce and eliminate VOC emissions and use only products with A and E1 classifications. Our factories favour European materials, sourced from Italy and Germany and recyclable. They use FSC or PEFC certified wood and Oeko Tex certified fabrics.

The reduction and recycling of waste and packaging is a concern shared by all.
